10:30-10:40

Break

10:40-11:15

Getting Strategic with HP
HP will focus on what the customers most demanding business requirements — creating innovative products and solutions that enables these customers with the lowest cost of ownership through giving them better choices and flexibility as well as assuring stability and security in places that matter most. During the session we will review the progression of chip technology, HP-UX 11i, Itanium (Integrity) server roadmaps, virtualization and their O/S platforms — Linux, Windows and Open VMS.
Matthew Baynard, Business Critical Specialist

11:15-12:00

Doing more with less with Management Tools: HP Openview
Keith Wilson, Melillo Consulting

12:00-1:00
